TOTES FOR BOTTLES

CROSS-REFERENCE TO RELATED APPLICATIONS

[0001] The present application claims the benefit of and priority to U.S. Provisional Application Serial No. 60/535,443, filed on January 9, 2004, the entire content of which is incorporated herein by reference.

BACKGROUND

Technical Field

[0002] The present disclosure relates to portable bottle carriers and, more particularly, to tote bags suitable for carrying at least one bottle of wine.

Background of Related Art

[0003] Heretofore, when carrying wine bottles in a paper bag, sack or the like, the glass wine bottles, unless restrained or held separated in the bag, could jostle against each other with the result that one or more bottles may break. Even if the bag is carefully handled to prevent breakage of the bottles, the bottles still may strike against each other such that a ringing or other irritating sound is produced. Moreover, the relatively thin nature of the paper bag or sack renders the bottles contained therein vulnerable to breakage as the result of the paper bag or sack striking and/or banging against another object. In addition, paper bags or sacs are incapable of independently retaining the bottle therein, thereby resulting in bottles slipping out of or otherwise disassociating from the paper bag or sac upon transport thereof.
